

RAJA MUHAMMAD KAMRAN AFZAL

AI ENGINEER | MACHINE LEARNING DEVELOPER | FRONTEND WEB DEVELOPER

📍 Islamabad, Pakistan 📞 +92-330-6927488 ✉️ rajakami854@gmail.com
🌐 linkedin.com/in/raja-kamran-550850331 🏠 github.com/Rajakamran12

👤 PROFESSIONAL SUMMARY

AI Engineer and Frontend Web Developer with hands-on experience across Machine Learning, Deep Learning, Computer Vision, NLP, and Reinforcement Learning. Skilled in designing intelligent systems and building responsive, user-focused web applications, with a proven ability to translate research-driven AI concepts into practical, real-world solutions.

🏢 PROFESSIONAL EXPERIENCE

Freelance AI Projects January 2026 – Present

Freelance (Local Projects) — Remote, Pakistan

- Designed and developed AI-driven web applications and automation scripts using Python and modern machine learning techniques for independent client projects.
- Communicated directly with clients to gather requirements and deliver tailored AI solutions on schedule.

Frontend Web Developer March 2025 – September 2025

Vertex Solutions — Islamabad, Pakistan

- Led frontend development alongside AI-driven feature integration, maintaining consistency across system architecture while collaborating closely with backend and design teams.
- Upheld high code quality and performance standards across all delivered components.

💡 TECHNICAL PROJECTS

Gesture-Based PC Control System Final Year Project

- Developed a computer vision-based automation system using Python and OpenCV to control PC operations through real-time hand gesture recognition.
- Applied advanced image processing and landmark-tracking techniques to translate physical hand movements into accurate system commands.

Night Image Visibility Improver Computer Vision Project

- Built an image enhancement pipeline using contrast enhancement and noise reduction techniques to improve visibility and clarity of low-light, nighttime images.

Book Recommendation System NLP Project

- Designed a content-based recommendation engine using NLP text vectorization and similarity scoring to suggest books based on user interest.

Spam Email Classifier Machine Learning Project

- Built a machine learning classification model with text preprocessing and feature extraction to detect and filter spam emails with high accuracy.

Pest Detection System ANN Project

- Developed and tuned an ANN-based image classification model to detect and identify agricultural pests from image data.

Gaming Company AI Agent Deployment Analysis RL / DL Project

- Analyzed and designed a reinforcement learning-based AI agent deployment strategy, applying deep learning concepts to evaluate agent performance and deployment feasibility.

🗣️ LANGUAGES

- English** — Professional Working Proficiency
- Urdu** — Native

⚙️ TECHNICAL SKILLS

🔗 Programming & AI

- Python
- C++
- Machine Learning
- Deep Learning
- ANN
- Computer Vision
- OpenCV
- NLP
- Generative AI

🌐 Web Development

- HTML/CSS
- JavaScript
- React
- Supabase
- REST APIs
- NextJS

✂️ Tools & Platforms

- LaTeX
- GitHub
- Assembly
- Data Automation
- Data Preprocessing
- Model Training & Evaluation

★ Professional Strengths

- Attention to Detail
- Logical Approach
- Creative Problem Solving
- Remote Collaboration

🎓 EDUCATION

Bachelor of Science in Artificial Intelligence (BSAI)

SZABIST University, H-8, Islamabad, Pakistan
2023 – 2027

Intermediate (I.C.S – Computer Science)

Askaria College, Rawalpindi/Islamabad, Pakistan
2020 – 2022

🏆 ACHIEVEMENTS

- Microsoft Learn Student Ambassador (MLSA) Lead
- Participated in technical programming competitions
- 1st place, soccer competition
- Presenter at student seminars
